Signature250

Intermediate current profiling range that includes wave height/direction and ice tracking capability

The Signature250 ADCP is a medium-range current profiler with a suite of extra features. It has a current profiling range of 200 m, and can measure wave height, period and direction at depths as great as 150 m. The Signature250 ADCP can also measure acoustic ranging to ice. Its compact design and low power consumption make it an ideal tool for long-term deployments in all waters.

Highlights

- ✓ 200 m current profiling range
- ✓ Wave height and direction from 150 m installation depth
- ✓ Acoustic ranging to ice

Applications

- ✓ Ice drift and draft measurements
- ✓ Long-term deployments requiring directional wave measurements and mid-depth current profiles
- Upwelling and downwelling, large-scale mixing studies
