

Alize

Advantages

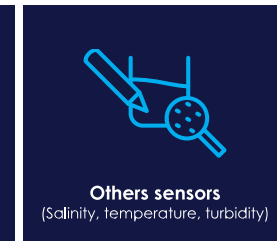

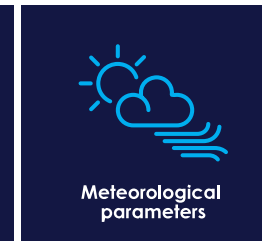

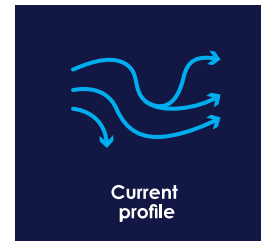

- Real time transmission 24/7
- High reliability and accuracy
- Robust and purpose built design
- Customizable sensor packages

01	Real time transmission
02	Weather station
03	St Andrew cross
04	Flashing light
05	Electronic box
06	Solar panels
07	Inertial motion sensor (waves)
08	Battery
09	Sensors on request
10	Current profiler
11	Mooring point

Characteristics

Applications

Feasibility study of the energy potential of wind farms	
Safety of maritime operations during the construction phase	
Assistance for maritime traffic between offshore infrastructures	
Optimization of dredging operations	
Early warning system
