

Zephyr

Advantages

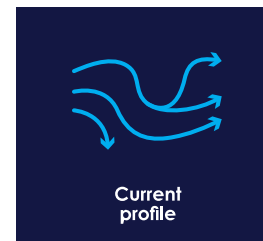

- Real time transmission 24/7
- High reliability and accuracy
- Lightweight and easy to deploy
- Customizable sensor packages

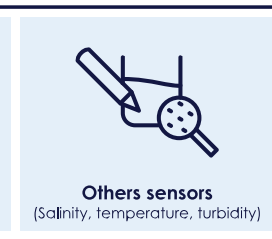

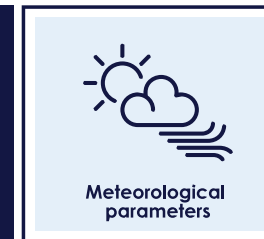

- | | |
|----|--------------------------------|
| 01 | Real time transmission |
| 02 | Flashing light |
| 03 | Solar panels |
| 04 | Electronic box |
| 05 | Inertial motion sensor (waves) |
| 06 | Battery |
| 07 | Sensors on request |
| 08 | Current profiler |
| 09 | Mooring point |

Characteristics

Options

Applications

Landing and connection of wind farm cables	
Operational weather window decision making for site access	
Aid to navigation in port areas	
Feasibility study for the design of coastal and port infrastructures	
Hydrodynamic sedimentation studies	
Integration into a numerical model to provide local weather forecasts
