

# Vector

4000 m

**Investigation des vitesses 3D dans les zones limites jusqu'à des profondeurs de 4000 m**

The Vector is a high-accuracy single-point current meter that is capable of acquiring 3D velocity in a very small volume at rates up to 64 Hz. It is widely used for sediment transport applications, small-scale turbulence measurements and coastal engineering studies. It has an excellent track record of delivering outstanding data quality in a variety of applications. This titanium version of the Vector is suitable for investigating deep-water currents down to depths of 4000 m.

## Highlights

- ✓ Small-scale turbulence
- ✓ Sampling up to 64 Hz
- ✓ Small sampling volume for measurements close to boundaries

## Applications

- ✓ Studies of bottom boundary layers
- ✓ Studies of deep-water currents
- ✓ Ocean engineering projects
- ✓ Low flow measurements
- ✓ Flux measurements
- ✓ Deep ocean mining support

## Technical specifications

### Water velocity measurements

|  |   |
|--|---|
| Maximum profiling range                  | N/A   |
| Distance from probe                      | 0.15 m  |
| Sampling volume diameter                 | 15 mm   |
| Sampling volume height (user-selectable) | 5-20 mm   |
| Cell size                                | N/A   |
| Velocity range                           | ±0.01, 0.1, 0.3, 1, 2, 4, 7 m/s (software-selectable) |
| Adaptive ping interval                   | N/A   |
| Accuracy                                 | ±0.5% of measured value ±1 mm/s                       |
| Velocity precision                       | typ. 1% of velocity range (at 16 Hz)                  |
| Sampling rate (output)                   | 1-64 Hz   |
| Internal sampling rate                   | 100-250 Hz  |

### Distance measurements

|               |     |
|---------------|-----|
| Minimum range | N/A |
|---------------|-----|

## Distance measurements

|               |     |
|---------------|-----|
| Maximum range | N/A |
| Cell size     | N/A |
| Accuracy      | N/A |
| Sampling rate | N/A |

## Echo intensity

|                    |         |
|--------------------|---------|
| Acoustic frequency | 6 MHz   |
| Resolution         | 0.45 dB |
| Dynamic range      | 90 dB   |

## Sensors

|                           |  |
|---------------------------|--|
| Temperature:              | Thermistor embedded in end bell            |
| Temp. range               | -4 to +40 °C                               |
| Temp. accuracy/resolution | 0.1 °C/0.01 °C                             |
| Temp. time response       | 10 min                                     |
| Compass:                  | Magnetometer                               |
| Accuracy/resolution       | 2°/0.1° for tilt < 20°                     |
| Tilt:                     | Liquid level                               |
| Accuracy/resolution       | 0.2°/0.1°                                  |
| Maximum tilt              | 30°  |
| Up or Down                | Automatic detect                           |
| Pressure:                 | Piezoresistive                             |
| Range                     | 0-4000 m                                   |
| Accuracy/precision        | 0.5% FS / Better than 0.005% of full scale |

## Analog inputs

|   |  |
|---|--|
| No. of channels                         | 2  |
| Supply voltage to analog output devices | Three options selectable through firmware commands: 1) Battery voltage/500 mA, 2) +5 V/250 mA, 3) +12 V/100 mA |

## Data recording

|                        |   |
|------------------------|---|
| Capacity (standard):   | 16 GB                                       |
| Data record (Standard) | 24 bytes at sampling rate + 28 bytes/second |
| Data record (IMU)      | 72 bytes at sampling rate                   |

## Real-time clock

|                            |             |
|----------------------------|-------------|
| Accuracy                   | ±1 min/year |
| Backup in absence of power | 4 weeks     |

## Data communications

|                             |  |
|-----------------------------|--|
| I/O                         | RS-232 or RS-422   |
| Communication baud rate     | 300-115 200 Bd   |
| Recorder download baud rate | 600/1200 kBd for both RS-232 and RS-422  |
| User control                | Handled via "Vector" software, ActiveX® function calls, or direct commands.          |
| Analog outputs              | 3 channels standard, one for each velocity component or two velocities and pressure. |

## Data communications

|                 |  |
|-----------------|--|
| Output range    | 0-5 V, scaling is user-selectable.                                 |
| Synchronization | TTL (5 V tolerant) sync in/sync out, start on sync, sample on sync |

## Connectors

|          |                                       |
|----------|---------------------------------------|
| Bulkhead | MCBH-8-FS                             |
| Cable    | PMCIL-8-MP on 10 m polyurethane cable |

## Software

|           |  |
|-----------|--|
| Functions | Deployment planning, instrument configuration, data retrieval and conversion (for Windows®). |
|-----------|--|

## Multi unit operation

|          |     |
|----------|-----|
| Software | N/A |
| I/O      | N/A |

## Power

|                           |                     |
|---------------------------|---------------------|
| DC input                  | 9-15 V DC           |
| Maximum peak current      | 3 A                 |
| Max. consumption          | 1.5 W at 64 Hz      |
| Typical consumption, 4 Hz | 0.6 - 1 W           |
| Sleep consumption         | < 100 µA            |
| Transmit power            | 2 adjustable levels |

## Batteries

|                          |  |
|--------------------------|--|
| Battery capacity         | 50 Wh (alkaline or Li-ion), 165 Wh (lithium), single or dual |
| New battery voltage      | 13.5 V DC (alkaline)   |
| Data collection capacity | Refer to planning section in software                        |

## Environmental

|                       |                           |
|-----------------------|---------------------------|
| Operating temperature | -4 to +40 °C              |
| Storage temperature   | -20 to +60 °C             |
| Vibration             | IEC 60068-1/IEC60068-2-64 |
| Depth rating          | 4000 m                    |

## Materials

|                |  |
|----------------|--|
| Standard model | Titanium housing. Titanium probe and fasteners |
|----------------|--|

## Dimensions

|                  |  |
|------------------|--|
| Maximum diameter | 84 mm  |
| Maximum length   | 485 mm (housing only), 246 mm (fixed stem) add 110 mm for double battery |

## Weight

|                 |        |
|-----------------|--------|
| Weight in air   | 8.3 kg |
| Weight in water | 5.1 kg |

## Options

Probe mounted on fixed stem or on 2 m cable

---

Vertical or horizontal probes

---

Alkaline, lithium or Li-ion external batteries

---

IMU - Inertial Measurement Unit
