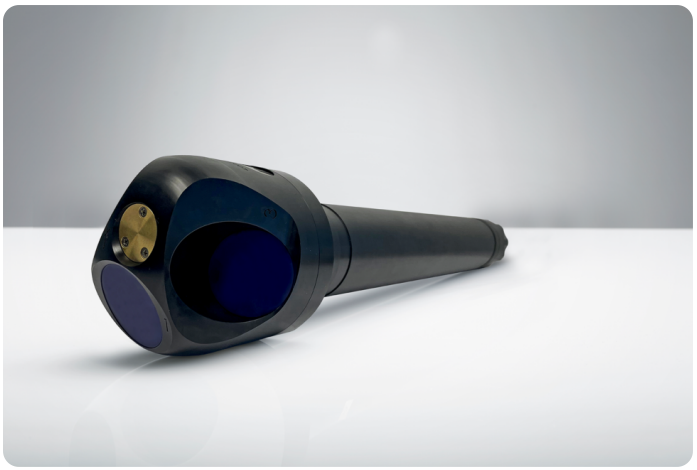
Aquadopp Profiler 600 kHz

500 m, Generation 2

Up to 40 m current profiling range; easy to operate and deploy



The Aquadopp Profiler is a highly versatile Acoustic Doppler Current Profiler (ADCP) available in four profiling range options, from < 1 m to > 85 m. The 600 kHz version has a current profiling range of up to 40 m. Designed for simple yet powerful operation, this current profiler is packed with features used by engineers and researchers to enable accurate and effective hydrodynamic data collection in a variety of environmental conditions.

See the details of the Generation 2 Aquadopp updates in the release notes here.
