

AWAC 1 MHz - 300 m, Generation 2

NEW!

Real-time current profiles and directional waves for shallow water

The AWAC 1 MHz ADCP has become the standard reference technology in submerged wave-measurement applications. Thousands of these ADCPs have been deployed to capture the full wave spectrum in combination with current profiles. With a 35 m maximum range for wave measurements, 4 Hz sampling of the surface elevation and onboard wave processing for real-time applications, the AWAC 1 MHz is the optimal tool for shallow current and wave measurements.

The AWAC Generation 2 design offers future-proof electronics, improved performance and easier instrument maintenance.

See the details of the Generation 2 AWAC updates in the release notes [here](#).
