

Nucleus 1000

300 m

A sensor hub that makes vehicle control and navigation possible.

The Nucleus 1000 is a sensor package that has all the necessary sensors and data products to aid in subsea navigation and vehicle control. This includes estimates of distance from the surface and bottom, attitude, heading and velocity. To learn more about the Nucleus 1000's capabilities, click here.

A deep water (1000 m rated) version and an OEM housing version of the Nucleus 1000 are also available.
